

Full-Line Coverage For Critical Target Categories

Raybestos® Specialty Performance Rotors

Taking it to the Extreme

Raybestos® Performance rotors are specifically designed for demanding drivers looking for supreme performance. These rotors are ideal for high-performance situations, towing, increased weight demands and street performance. Providing improved pedal feel, lasting rust prevention and increased pad life, these performance rotors deliver less pedal effort and more braking power. Drivers experience stronger bite without sacrificing smooth braking. They exceed the fit, form and function of the OE to deliver dependable performance and durability. Vehicle-specific cooling vane configurations and application-specific iron combine to dampen noise and improve responsiveness for braking that is super smooth and ultra quiet.

- Covering street performance, truck, SUV and luxury car applications
- Enhanced metallurgy for increased performance demands
- Black Fusion or Grey Fusion 4.0™ coating
 - Protective coating improves appearance for a clean finished look
- Patented S-groove slot designs for improved pedal feel on select applications
 - Maximizes pad to rotor contact for stronger bite, smoother braking and increased pad life
 - Prevents brake fade and promotes simultaneous out-gassing for superior panic-stop braking
 - Less prone to cracking than competitive drilled rotor designs
- Vehicle specific designs
 - Match OE form, fit and function for ultimate strength
- Tightest lateral run-out
 - 0.05mm (0.002") or less for reduced pedal pulsation, brake noise and extended pad life
- Mill balanced edges
 - 100% validation ensures proper balance and minimizes vibration

Raybestos® Specialty Line

Bringing together innovation and superior engineering, Raybestos® specifically designed these specialty disc pads and rotors with application-specific formulas and full-line coverage for critical target categories.

Truck • School Bus • Police • Performance • European
